

CALCIUM CHLORIDE SOLUTION

BATCH NUMBERING STATEMENT FOR LIQUIDOW® FOOD GRADE

Occidental Chemical Corporation (OxyChem) uses a batch numbering system in the production and shipping of LIQUIDOW® Food Grade Calcium Chloride Solution. The batch numbering system provides specific information regarding the production location and production date of the material. The LIQUIDOW® Food Grade batch number consists of ten (10) alpha-numeric characters in the following format: FFFFYMDDTT

Batch FFFFYMDDTT:

- FFFF denotes the FACILITY code (1462)
- Y denotes the YEAR code (A = 2025, B = 2026, C = 2027)
- M denotes the MONTH code (A = January, B = February, C = March, etc.)
- DD denotes the two-digit DAY of the month
- TT denotes the ship tank (42 or 28)

Example:

Material bearing the batch number **1462AI1728** would be deciphered as:

(1462)(A)(I)(17)(28) - material was shipped from location **1462**, manufactured on **September 17, 2025**, from ship tank 28

The production date of September 17, 2025, is derived from the date code of **AI17**:

A = 2025

I = September; I is the 9th letter of the alphabet, therefore the 9th month of the year

17 = 17th day of the month
